Panama Police Mr. Pepper, and 'Magnolia Days'

This is no comic opera — it really occurred in Panama, the little republic which surrounds our Panama Canal.

Back in May, 1948, the National Electoral Jury canvassed the vote and said a man named Arias was elected president. But Arias had a friend, Jose Remon, police chief, who said there is the only armed group in the republic.

Yesterday the National Electoral Jury recounted those ancient ballots from May, 1948 — and declared Arias wasn't really elected at all; as a matter of fact, Arias was elected at that time — and now takes over the presidency.

That's what the judicial body said.

Or rather — that's what the 2,000 policemen said, who are run by Chief Remon, Arias' good friend and the new president.

Gilbert and Sullivan would have done a good job in light opera with this material — and the Associated Press didn't do a bad one in just reciting the cold facts.

Senator Claude Pepper of Florida, about whom there is a good deal of doubt as to whether he is a Democrat or the potential hatcher of a new Left Wing party, came out of the White House conference yesterday and took a potshot at James L. Byrnes — Byrnes having previously taken a couple of shots at the White House.

Said Pepper: "Byrnes has lost his sense of direction and wants to take the South back to the Magnolia days of the Civil War period."

Pepper's no friend of President Truman, and he's no friend of the Democratic national convention he opposed the president and offered himself as a Left Wing candidate.

Pepper's no friend of Byrnes. The Floridian is one of the nation's top table talkers, and he's got a lot of questions and few answers — while Byrnes, former cabinet officer and South Carolina's most distinguished citizen, has usually found himself on the administrative side of the question where you like to restrict questions to as few as possible so you'll be able to find some kind of answer for them.

The row between Truman and Byrnes is an honorable dispute over the national policy — Truman striving for a still bigger, still more expensive federal government, while Byrnes holds a policy of moderation, demanding that some of the wartime expansion of the federal government be cut back.

Pepper, friend of no man — jumps into a quarrel not his own. He won't worry Byrnes. The man he'll worry is President Truman — who pretty well knows when Jimmy Byrnes stands, he hasn't a ghost of an idea where Pepper will be tomorrow.

U. S. Protests Red Slaying of American

Berlin, Nov. 26 — (UP) — Maj. Gen. Maxwell Taylor personally protested to Russian headquarters today against the shooting of a U. S. air force sergeant, denouncing the killing as an act of "senseless brutality" by a Soviet soldier.

The U. S. command in Berlin demanded that the killer be punished immediately, and that steps be taken to assure that henceforth "Russian soldiers will be controlled in the irresponsible use of their weapons."

The slain soldier was Staff Sgt. John E. Staff of Ramsey, Ill. He was shot through the head last night at a Russian checkpoint on the zonal border in Berlin. Two other American soldiers and a German girl in the car with him were uninjured.

Taylor said Staff was killed by a Soviet soldier while riding in a plainly marked official car of the U. S. air force. The soldier drove up to the checkpoint to ask directions. Witnesses said he was directed to drive into the Soviet sector, but instead turned around and started back toward the British sector. Four shots were fired, and Staff slumped dead over the wheel.

Taylor took the unusual step of going personally to Russian headquarters to deliver his letters of protest. He was told that the Soviet commandant, Maj. Gen. Alexander Kotikov, was ill and could not see him. The protest was delivered to Col. Alexi Yelissarov.

Taylor said Staff was shot when he turned his car toward the British sector and started back toward the center of Berlin, adding: "It is difficult to understand the senseless brutality of a sentry who would fire upon a member of the armed forces of a friendly nation under such circumstances."

"I trust you will appreciate the seriousness with which the United States authorities view this act, and will take immediate steps to punish the offender."

Information of the action taken not only to punish this crime but also to assure that in the future Russian sentries will be controlled in the irresponsible use of their weapons.

Taylor's statement was the first official word that a Russian sentry had fired the fatal shot. Earlier today investigators said they did not have positive proof of who fired it. Two Russian soldiers and a German policeman were on duty at the checkpoint.

But Taylor's protest said that "according to the information I have received," the soldier "was fired upon and killed by a Soviet sentry."

Staff died in the British military hospital in the Gatow district of Berlin soon after he was admitted.

Los Angeles, Nov. 26 — (UP) — Janitor Charles Jansen's handwritten matches that on a flood of postcards warning Eastern tourists away from "terrorized" Los Angeles, postal inspectors said today.

Jansen, arrested yesterday, denied he was responsible for the campaign by the "public relations committee" of the non-existent "Los Angeles Citizens' Safety Council," in cooperation with the National Tourists and Travelers Assn.

City police called in postal inspectors when out-of-state chambers of commerce reported receiving hundreds of the cards with Los Angeles, Calif., postmarks. Prospective visitors here were advised by the cards that Southern California was a haven for criminal elements who terrorized tourists and residents with unchecked lawlessness.

The local chamber of commerce was forced to send answering letters denying charges in the "terrorist" campaign against Los Angeles.

Jansen, alias Charles Larson and Claude English, will answer at a preliminary hearing Dec. 8 to a charge of "sending defamatory mail." He is charged with sending 100,000 cards through the mails.

At his arraignment yesterday, U. S. Commissioner Howard V. Calverly said:

"The language used probably wouldn't be an offense if placed in a sealed envelope, but it probably is if on a postal card."

Calverly set the 56-year-old suspect's bond at \$500. Federal authorities said he is on probation after serving a 60-day jail sentence for illegal gun possession.

The accusation specifies that Jansen mailed a card Nov. 13 from San Diego to the Phoenix, Ariz., Chamber of Commerce, averring said message was "scurrilous and defamatory."

Authorities said the alleged poison penman's mailing list included chambers of commerce throughout some 35 states.

Chief of Police William A. Wor-ton said his intelligence unit shadowed Jansen for about a week.

'Bojangles'
Dies at the
Age of 71

New York, Nov. 26 — (UP) — The death of Bill "Bojangles" Robinson, Negro dancer who spent a \$3,000,000 fortune as fast as he earned it, saddened Broadway friends today who were planning a benefit performance for him when he died.

The 71-year-old tap dancer died almost penniless last night at a Columbia Presbyterian medical center where he had been ill with a heart ailment for two weeks.

Broadway performers cancelled a night club show they had scheduled for Dec. 5 to provide Robinson with money to meet his medical expenses. Instead they planned to visit the Abyssinian Baptist church in Harlem where the famous hooper will lie in state until his funeral services Monday. He will be buried in Evergreen cemetery, Brooklyn.

Hundreds of messages of condolence poured in to his 28-year-old wife, Elaine, from celebrities and fans who had been fascinated by the exuberant tap rhythms which earned Robinson the title of "King of Tap Dancers."

Robinson achieved fame not only as a star in his own right but as a teacher of stars. Among his dancing pupils were Eleanor Powell, Dorothy Stone and Ruby Keeler.

Screen Star Shirley Temple, whom Robinson taught to dance when she was the dimpled baby star of "The Little Colonel," said in Hollywood that his death meant "the loss of a wonderful friend."

"Bill was a great dancing partner," she said. "He wanted to see my baby very badly and wrote that he was bringing her a pair of dancing shoes when he came out here. But now he never will."

Hospital officials said Robinson died peacefully in an oxygen tent where he had been almost constantly for the past week. With him were his wife and her sister, Doctors said he had fought hard for his life, but took a turn for the worse early yesterday.

Search Continues
for Wreckage of
Missing Plane

New Iberia, La., Nov. 26 — (UP) — A search party planned a boat and swamp-slogging trip today in search of airplane wreckage believed to contain the remains of three Alton, Pa., residents.

The wreckage was found two weeks ago by C. A. Doyle of New Iberia. He believed it that of a four-passenger plane which disappeared Nov. 10, 1947, with Mr. and Mrs. W. W. York and pilot Joel Ritter aboard.

Doyle reported seeing three skeletons and he barely-visible registration numbers of the York plane.

The search party was made up of civil aeronautics authority officials, relatives of the dead, reporters, and an Altona, Pa., dentist who hoped to identify them by dental charts.

The group had walkie-talkie equipment, Doyle said it was necessary to travel two hours by boat, and then go by foot for eight miles through the swamps before reaching the wreckage.

The opinion stated that McClen-don must pay the "processor of distributor" fee called for by the ordinance in question only on the amount of milk which he actually sold and sells in Hope, and not on the entire production of the Borden plant. The Court said that no difficulty was involved in separating that part of the finished product — bottled, pasteurized milk — which came to Hope from that which went elsewhere. However, with reference to the "processors" or raw milk inspection fees, the Court held that the City may legally collect such charges on all the milk received at the Borden plant in Texarkana because it was impossible to segregate the raw milk which will be sold elsewhere from that part which, when pasteurized, will later come to Hope, as can be easily done in the case of the finished bottled milk.

Ordinance No. 644 was ruled a valid enactment of the City Council and the opinion stated that it may be enforced subject to the provisions of the court's decree.

Attorneys interested in the case were still studying the lengthy opinion today. One of them stated that it appeared neither side had won a clear-cut victory as the court was still studying the case on some points raised and in the City's favor on others.

It could not be learned immediately whether or not either side would appeal the decision to the Supreme Court.

Washington, Nov. 26 — (AP) — A high government official said privately today that a senator's television discussion of atomic energy helped touch off a presidential crackdown on talk about defense secrets.

But the senator — Edwin C. Johnson (D-Colo.) — denied emphatically that the broadcast had any part in President Truman's action late yesterday. And Johnson reiterated that he thinks there has been too little secrecy — not too much — about the atomic energy program.

The President late yesterday directed Attorney General McGrath to tighten up the safeguarding of atomic and other national security information, McGrath and Senator McMahon (D-Conn.), chairman of the senate-house atomic energy committee, told newsmen about the order after conferring with Mr. Truman for more than an hour.

Neither McGrath nor McMahon would say what prompted the order, but they declined to answer questions about Johnson.

But an official entirely familiar with the reasons for the crackdown order told a reporter:

"There has been a series of incidents endangering security which disturbed the President, but it is safe to say that the whole thing was brought to a head by the Johnson telecast."

The television program to which he referred originated in New York on Nov. 1. The subject of the panel discussion was: "Is there too much secrecy in our atomic program?"

Johnson, a member of the joint atomic committee, argued that there is not enough secrecy. But during the debate he asserted that: "This country's scientists have developed an A-bomb which has six times the effectiveness of the bomb dropped at Nagasaki in 1945."

Johnson also made considerable progress — on an A-bomb 1,000 times more powerful than the Nagasaki weapon.

American scientists have gone far toward finding a way to explode an enemy bomb before it reaches its target.

Johnson said later that he disclosed nothing that was not already public information. And he said that in referring to the data during the telecast as "top secret," he was talking about "know-how" — knowledge of how to manufacture the things he discussed.

Johnson said he was told by a "top source" after yesterday's White House conference that the telecast in which he participated was in no way responsible for Mr. Truman's order.

This is the formation from which Arkansas first oil well produced and has been neglected for many years. New portable drilling machinery, such wells can be drilled and casing set in three days.

Nat'l Grange Denounces Brannan Plan

Sacramento, Calif., Nov. 26 (AP)—The National Grange has rejected the Brannan farm price support program as "an internal enemy that would ultimately destroy our free enterprise system."

The resolution condemning the farm program proposed by Secretary of Agriculture Charles F. Brannan was a highlight of the closing session of the 12-day national grange convention last night.

Delegates from 37 states took part in the fifth two-year term just before passing the resolution which said of the Brannan plan:

"The proposal has totally undesirable political implications. Clearly, under such a system, that party which would promise to farmers the largest bonus out of the treasury would gain many votes not obtainable on the basis of an honest, sound platform."

"It would then become a race to see which party would promise most."

The resolution said that Brannan type of subsidy would make farmers' public hearings for fair in "come" and destroy their character and self reliance.

(The Brannan plan, shelved at the recent congress, calls for full parity supports through purchases and loans, as at present for corn, wheat, rice, peanuts and tobacco. For perishable products the price would be permitted to seek its natural level in the market place. The government would determine a "fair price" in advance and pay the producers the difference between that price and the natural price, if it were lower.)

The resolution suggested that today's farm problem results largely from unsound methods. "The output of farms and of industry have not been kept in proper balance," it said. "Farm products have not reached the right markets and our nation has not given enough consideration to fair better diet for our entire population."

The subsidy method of solving the difficulties was assailed as "at best a temporary device which will only serve to postpone the time when a sound solution must be reached."

The resolution maintains there are other means that the Brannan plan to help the farmer obtain a fair income. It specifically recommends more and better cooperative marketing and the use of a dual or multiple price system.

A large number of new drilling permits have been issued recently for nearly every field in the area. The Ramsey Exploration company reported completion of the N.S. Yarbrough No. 1, section 191519, Ouachita county, from Hogg sand this week, at 3,220 feet. A survey showed more than 30 feet of sand in the well, but all except about eight feet was under water. The section above the water was perforated and a good pump report drilled and casing set in three days.

At Least Three Companies Post Gas Price Drop

Little Rock, Nov. 26 (UP)—At least three major gasoline companies in Arkansas were operating with a slight cut in the price to distributors today, with retail gasoline reflecting the price change.

Other companies indicated they would follow suit. A cut of two-tenths of a cent was put into effect here by the Esso Standard Oil Co. yesterday and by Cities Service and Lion Oil Companies today.

The amount of the price decrease varied in other sections of the state, depending upon freight costs for movement of gasoline from the refineries.

Conoco and Gulf Oil Co. officials here said they were awaiting word from their division offices but there was little doubt that they, too, would follow the lead of the other companies.

DOROTHY DIX Back-Seat Wives

Dear Dorothy Dix: I have two single sisters, business women, who constantly harp about my husband's neglect of me, and my being a slave to him and my children until I could scream. My husband is everything that is fine and solid and dependable. He gives my sisters the use of our home with all its privileges as though it was theirs, yet they are always criticizing him. When he returns from a hard day at the office he must not sit down and take his ease. He must sit up as if he were entertaining company, or take me out somewhere. The children must watch their steps as to manners and speech. Sometimes we must go out visiting to get away from their bickering. If my husband suits me, what business is it of theirs?

MRS. J.M.

Answer: None whatever, and my earnest advice to you is to stiffen up your backbone and tell them so. Also, while you are telling, tell them that the theory of life is to be happy though married is one thing and the reality of it something quite different, and that a spinster is no more fitted to give advice concerning the holy estate than a landlubber is to pilot a ship across an unknown sea.

Wasting Their Pity

Tell them, to begin with, that they are wasting their pity upon you and that in the domestic slave very they so much deplore you are finding your greatest happiness. Perhaps you do have to work about fourteen hours a day, but it is labor that is more interesting than a landlubber's to pilot a ship across an unknown sea. Perhaps the four walls of your home do bound your universe, but it is a tight little Paradise for you.

Everything in life depends on the point of view. A home is a jail or the dearest spot on earth. Working to support a family and making a husband or wife comfortable and happy is the most worthwhile work in the world, or an insupportable burden. Children are tiresome brats, or adorable angels. Sitting by the fire with husband or wife of an evening is a pleasure or a bore just as you find it, and just as you feel about it. We take out of marriage just what we put into it.

And so your unmarried sisters, who see in you only a woman who is, as the phrase goes, "tied down" by her husband and children, and who has to work, and who can't get around of an evening or have as many clothes, as they do, feel sorry for you, and they don't know that you are having a better time than they are, and that you are secretly extending your sympathy to them.

Dear Miss Dix: You ignore the question of legal and financial responsibility when you advocate woman's right to propose. What does a proposal from a woman consist of? Simply an ironbound request that a man will assume all the legal and financial responsibilities of a marriage for ever and ever. How can a man

U. S. Congressmen See Japanese Diet in Action

Tokyo, Nov. 26 (AP)—Four American congressmen saw the Japanese diet (parliament) in action today and met some Japanese legislators who soon will go to Washington to see how congress operates.

The four are Reps. Norrell (D Ark.), Passman (D Ala.), Kruse (D Ind.) and Miller (R Neb). They will leave for Washington Monday.
